d. It is broad and general.

the 1990s, the U.S. economy has been characterized by a rapid pace of technological change, a high rate of innovation, and a high rate of productivity growth. This has led to a significant increase in the demand for skilled labor, and a corresponding increase in the wage premium for skilled workers. The demand for skilled labor has been driven by a number of factors, including the increasing importance of technology in the economy, the increasing importance of innovation, and the increasing importance of productivity growth. The wage premium for skilled workers has been driven by a number of factors, including the increasing demand for skilled labor, the increasing importance of technology, and the increasing importance of innovation. The demand for skilled labor has been driven by a number of factors, including the increasing importance of technology in the economy, the increasing importance of innovation, and the increasing importance of productivity growth. The wage premium for skilled workers has been driven by a number of factors, including the increasing demand for skilled labor, the increasing importance of technology, and the increasing importance of innovation.
